

ARROW ENERGY COAL SEAM GAS EXPLORATION COMMUNITY INFORMATION SESSIONS

Arrow Energy, a Queensland based coal seam gas exploration and production company, is seeking to increase public awareness and understanding of its activities throughout the central Queensland region.

Arrow (including one of its predecessor companies CH4 Pty Ltd) has been active in the region for some time, with its first successful project the supply of gas from the Moranbah region to power the Yabulu power station and some surrounding industries in Townsville, which commenced in 2005.

Arrow is now seeking to develop opportunities for supply of gas to new domestic and export markets, including a proposed LNG development at Curtis Island near Gladstone. As part of this work, Arrow will expand the scale and extent of exploration works throughout the northern Bowen Basin (between Glenden in the north, Blackwater in the south and east to Duringa), as well as the Hillsborough Basin in the Proserpine area, and the Styx and Capricorn Basins in the Marlborough – St Lawrence area.

If you would like to find out more about the exploration program and talk to the project team, please join us at a community information session.

Community information sessions will be held:

Proserpine	Monday 13 September, 9am-12pm at Proserpine CWA Hall, 4 Faust Street
Moranbah	Monday 13 September, 6pm-9pm at Moranbah Community Centre, Mills Avenue
Middlemount	Tuesday 14 September, 5pm-8pm at Middlemount Bowls Club, Centenary Drive
Marlborough	Wednesday 15 September, 11am-2pm at Marlborough Hall, Nilman Street

To assist with the catering please RSVP by ringing 1800 038 856
or emailing info@arrowenergy.com.au
