

Your town – we're on our way

Heart of Australia is steadily growing the number of towns being serviced on a monthly basis.

The Southern Route which is serviced by HEART 2 (new truck) goes to; Dalby, Stanthorpe, Goondiwindi, St George, Charleville, Roma and Quilpie.

The Northern Route which is serviced by HEART 1 (original truck) goes to; Emerald, Barcaldine, Longreach, Winton, Hughenden, Charters Towers, Moranbah, Cloncurry and Blackall.

We have plans to further expand our service area locations in other states across Australia.

COLLABORATIVE PARTNERS:

On the highway to health

Heart of Australia is a program that embodies the most innovative approach to frontline specialist medical service delivery in generations – helping people whose lives are threatened by this nation’s vast distances.

Heart of Australia brings monthly specialist medical services to rural and remote communities across Queensland on two, 2.25m-long, custom –designed clinics on wheels, each driven by a Kenworth K200 Prime Mover.

HEART 1 and HEART 2 are purpose built and their self-sufficient medical trailers provide several private clinic rooms, testing rooms as well as each truck having their own Reception area. Both mobile clinics are wheelchair accessible, fully air-conditioned and each with on-board toilet facilities.

Our mobile clinics brings specialists services to 16 towns across Queensland including; Dalby, Stanthorpe, Goondiwindi, St George, Charleville, Roma, Emerald, Barcaldine, Longreach, Winton, Hughenden, Charters Towers, Moranbah, Cloncurry, Blackall and Quilpie.

Heart of Australia is breaking the grip of distance that denies rural and remote Australians access to health services when and where they are needed most.

Services – to your doorstep

Heart of Australia delivers locally :

- Cardiology Consultations
- Stress Echocardiograms
- Exercise Stress Testing
- Echocardiograms
- Electrocardiograms

Giving back – thank you for having us

Heart of Australia offers educational and employment opportunities to the communities we service.

This includes training doctors and allied health professionals, offering work experience and professional development scholarships, and hiring staff locally wherever possible.
