

## Daandine Central Gas Processing Facility – shutdown activity

3 June 2022

Each year the Daandine Central Gas Processing Facility (CGPF) undergoes an annual maintenance shutdown. This year, the shutdown period will also allow for new equipment to be installed. The facility shutdown will take place from 8-9 June 2022.

Prior to, and during the maintenance activity, there will be additional vehicles on Dalby Kogan Road, travelling to the CGPF.

To enable maintenance to occur, gas is removed from the facility. Nearby wells may be turned down, gas is diverted to other facilities, with any remaining gas flared.

Flaring is the controlled burning of gas using specifically designed equipment in designated, safe areas.

Residents who live nearby the facility may notice a light from the flare, or a soft glow if further away. The flare's appearance will depend on weather conditions.

If nearby, residents may also notice an increase in noise associated with the flare.

### Find out more

If you would like further information on this activity, please contact the project team on 1800 038 856 (free call), email [info@arrowenergy.com.au](mailto:info@arrowenergy.com.au) or drop into our Community Information Centre situated at 42 Cunningham Street, Dalby.
