If yes, the development application must be lodged before an EA amendment application can be made. Under the EP Act, a development application for a material change of use of premises for an ERA is deemed to be also an application for an environmental authority. In this case, an EA amendment application should not be lodged.		
Is the proposed amendment solely to add or remove vehicles for ERA 57 (Regulated waste transport)?	<input type="checkbox"/> Yes <input type="checkbox"/> No

If yes, you cannot use this form. The amendment to the EA must not be inconsistent with the PRCP Schedule otherwise you must apply to amend your PRCP Schedule. Please use the form <a href="#">Application to amend a progressive rehabilitation and closure plan schedule (PRCP schedule) or joint PRCP schedule and environmental authority (ESR/2019/4956)</a> .		

**Section 6 – Major or minor amendment**

Is the application for a major or minor amendment?

Your application is a minor amendment (condition conversion) if you want to convert all conditions of your EA to the standard conditions for the ERA to which the EA relates. By selecting this amendment type you are certifying that you have a complete and thorough understanding of, and can comply with, the ERA Standard (eligibility criteria and standard conditions).

For applications other than a minor amendment (condition conversion), the administering authority decides if an application is a minor amendment (threshold) or a major amendment and will send you a notice of the decision.

If the application is a major amendment, an assessment fee of 30% of the annual fee for your EA is required to be paid. The assessment of your amendment application will not proceed until the assessment fee is paid.

No additional assessment fees apply if your application is determined to be a minor amendment.

By considering what type of amendment your application is likely to be, you will have a better idea of whether the assessment fee will be payable.

For further information see the [Guideline - Major and minor amendments \(ESR/2015/1684\)](#) and s223 of the EP Act. If you have questions regarding whether your amendment will be a minor or major amendment you are encouraged to arrange a pre-lodgement meeting with the administering authority. Only an indication can be given as to whether the proposed changes are likely to be a minor or major amendment, at a pre-lodgement meeting as this decision can only be made when the actual application is submitted.

Major amendment

Minor amendment (threshold)

Minor amendment (condition conversion)

For minor amendment (condition conversion) go to Section 31 (Payment of fees).

**Section 7 – Amendment options**

Complete this section for all applications, tick all that apply

I would like to amend the EA:

Activities – includes changes to thresholds

Locations – removal/addition of activity locations

Conditions – includes conversions to standard conditions and variations

**Section 8 – Describe the proposed amendment**

Provide a detailed description of your proposed amendment.

Include justification of how your proposed amendment meets the criteria for a major or minor amendment and attach any supporting information to this application.

If the amendment is to add or delete a location, tenure or activity, or to change the threshold of an activity, provide details below.

Arrow believes that the amendment application does not significantly increase the level of environmental harm caused by a relevant activity. Arrow believes that the authorisation to construct and operate the PPL has been approved subsequently and that the proposed amendment does not seek to increase the level of disturbance proposed or authorised and meets the criteria for a minor amendment (threshold). Instead, the application proposes to correctly reflect the impacts on PEMS based on the already approved PPL and EA.

The pipeline route, the subject of the original application, was preliminary and subject to further detailed design work. The route has undergone further design work and the route is now Final Layout Approved. This certainty of the route has enabled Arrow to finalise impact to Environmental values in general and to MSES in particular.

There is no increase in scale or intensity as a result of the proposed amendment. In fact there is a reduction in disturbance with the existing approved RoW being 40m in width and the disturbance associated with the PEMS linked to a 30m RoW. As such, Arrow believe the scale and intensity has reduced by 30% of the previously authorised disturbance based on a 40m RoW.

During the recent assessment of Significant Residual Impacts (SRI) for Jammatt Pipelines (PPL 2047) (hereafter 'the project'), using recently acquired verification data, it was identified that matters 1 to 13 are not currently included within Table 2 Protecting biodiversity values – 'Significant residual impacts to prescribed environmental matters' within the EA0002166. To enable offsets to be appropriately assessed for the proposed disturbance during construction of the pipelines, the relevant PEMs need to be included within this table. A copy of the Significant Residual Impact Assessment will be provided.

**Section 9 – Describe the land that will be affected by the proposed amendment**
