

# ROAD WORK AHEAD

## Road upgrades

Sections of Springvale Road, Grassdale Road & Abernethy Road

November 2022

Arrow Energy will undertake road works as part of the Surat Gas Project.

This work is to enable the local road network to safely accommodate the predicted increase in traffic as a result of Arrow's activities.

### What will the road works include?

Works will include maintenance and, in some instances, pavement strengthening and widening of:

- **The intersection of Grassdale Road and Abernethy Road**
- **The intersection of Springvale Road and Grassdale Road** (Old School Corner)
- **Abernethy Road** (minor upgrade)
- **Grassdale Road** (northern end of unsealed road, maintenance of approx. 1.7km)

### When will the works happen?

Works are scheduled to start in November 2022 at the Grassdale and Abernethy Road intersection before progressing to other areas. Work is expected to continue for six months allowing for wet weather delays. Typical construction hours will be 6am – 6pm.

While the road will always remain open, temporary traffic lights may lead to minor delays. The speed limit will be temporarily reduced, and water trucks will suppress dust as required.

Works are being undertaken by Arrow's local subcontractor FKG Group who will manage the day-to-day communication with residents in the area. Landholders adjacent to roadworks have been directly engaged by Arrow to discuss property access points and changes to the road alignment.

### Key Design Elements

- Pre-works approximately two weeks ahead of activity to dewater the floodways and clear out table drains
- Safety upgrades at the intersections are to accommodate heavy vehicles turning to and from Grassdale Road
- Reconstruction of floodways where required
- Schedule planning will include monitoring weather forecasts and adopting mitigations which may include:
  - Reducing the number of work fronts
  - Installing appropriate erosion and sediment controls
  - Using dewatering equipment to manage ponded water
- Springvale/Grassdale School bus run will be managed by traffic controllers and bus stops will remain open.

## Roadwork planning process

An independent Traffic Management Impact Assessment identified a need for this upgrade to manage the additional traffic volume as a result of Arrow's activity. The work is supported by Western Downs Regional Council (WDRC).
